

CAB-Batch-Type-Furnace

NEWS

2012/03

**Next XXL- Version of a sellacan CAB-BTF will go to
Messrs. NISSENS A/S in China
for more than 3,000 mm of core length
of plate & bar coolers**

Nissens has it's 3rd Batch-Type-Furnace for semi-continuous brazing process by automatic rack movement. sellacan already supplied two continuous CAB lines to the well-known Danish cooler manufacturer.

**CAB-Batch-Type-Furnace
in combination with a Vacuum Lock will go to
Messrs. Dolphin Manufacturing Ltd. in UAE**

The vacuum pump of the lock at the entrance of the furnace is installed to achieve rapidly the necessary nitrogen atmosphere by sucking out the oxygen of the chamber and of the internal system of the heat exchanger (e.j. charge air coolers or oil coolers). After injecting nitrogen into the chamber the loaded rack will transported into the furnace.

Messrs. Dolphin is using since 2007 our standard BTF.

**4th CAB-Batch Type Furnace
supplied to India**

2nd BTF successfully installed at

STANDARD RADIATORS Pvt. Ltd. Vadodara / India

Standard Radiators Pvt. Ltd. profits from the possibility to braze the heat exchangers in the new generation furnace in horizontal or in vertical position giving the greatest flexibility in production.

Reference List – AL-Brazing
