

1st CAB-Prototype-Furnace CAB-PTF in function

Since 2000 sellacan sold 37 Batch-Type-Furnaces world-wide, 12 more than we could inform one year ago. We thank to all of our customers for their confidence in us and in our furnaces. Users of our Brazing Furnaces reconfirm to appreciate our furnaces because of:

- Start up equipment for newcomer in aluminium brazing
- Variable use of different types of heat exchangers (size, weight, type). Capable for XXL dimensions
- Vertical brazing (CAC, Oil Cooler) and horizontal brazing
- Easy change between different types
- Suitable for test series and development of heat exchangers
- Low energy consumption, simple stand-by operation and short heating-up time

Always looking for the most flexible solution according to the requirements of users of our furnaces means for us:

Continual Innovation

Listening to our customers we found that some of them are needing another Innovation. Giving the answer now we can present for R&D purposes and very small series as well as for newcomers:

1st. CAB-Prototype Furnace PTF in function in MODINE Europe

in Germany for test series and development of new heat exchangers.

- Batch size with dimensions 300 x 1400 x 1200 mm (h x w x l) is offered.
- Loading capacity up to 40 kg gross.
- Electrical heating elements, capacity installed of 54 kW.
- Energy consumption as lowest as possible.
- Pre-cooling of brazed part under protective gas between furnace chamber and final cooling chamber
- We also can offer
 - heating by gas as well as
 - brazing chamber for vertical brazing position.

Reference List – AL-Brazing
